We help you **reduce your costs** for travel, patient records, and remote providers. Fund this state-of-the-art **EMR and Video Consulting** system from your monthly expense budget.

Key Advantages:

Choosing **e-Health Method™** requires no capital investment. Funded from your operating budget, use of **e-Health Method™** can deliver the following improvements to your practice or hospital:

- **Access and Workflow:**
 - Reduced medication errors
 - Anytime, anywhere access to Medical Records
 - Simultaneous access to Medical Records
 - Accuracy for coding evaluation
 - Workflow and patient communications
- **Video Consulting adds dimension:**
 - Shared patient records
 - Concurrent access by consulting physicians or specialists
 - Live audio/video collaboration
 - Anytime, anywhere...
- **Reduced Costs:**
 - Reduced time spent searching for records
 - Reduced transcription costs
 - Reduced staff travel cost and time
 - Place lower cost providers in satellite locations
- **Flexibility:**
 - Use **e-Health Method™** with or without our transcription service at special *low* rates for EMR clients.

Get peace of mind, reduce costs, and ensure continuity of care. Engage with

GMD to develop your own unique migration plan and path to an early return from electronic records and position your practice to selectively adopt future additional technologies as they become available.

Cost Effective:

As a subscriber to GMD's **e-Health Method™**, you are not required to make an up-front capital investment in server hardware or software and database licensing fees. VistA was developed with federal tax dollars. This enables GMD to offer an open source version of VistA in **e-Health Method™** that is nonproprietary and license free.

- Reduce the cost of multi-location practices' meetings and training with video conferencing and the **Video Consulting** option in **e-Health Method™**.
- All server-related tasks such as software upgrades and maintenance are performed in GMD's datacenters with no action required at your office.
- Since GMD's open source **e-Health Method™** system operates in its datacenters, there is no need to hire an IT staff.

Secure:

e-Health Method™ uses a HIPAA-compliant, state-of-the-art firewall and authentication technology. Patient data travels from your office through a secure

(Continued on page 3)

Internet connection to GMD's ASP data-centers. Patient data is encrypted using triple DES encryption. Each client's patient database is kept separate, safe, and secure from all other client patient databases. You and your patients always own the data.

Working with e-Health Method™

GMD's **e-Health Method™** is based on software components that have been proven over as many as twenty years in the US Department of Veterans Affairs' network of health care facilities and medical centers. In **e-Health Method™**, GMD has packaged proven EMR and **Video Consulting** function. The result is a collaborative solution for physician practices of all sizes.

Major functions included are Internet-based patient records, clinical support, training, and off-site maintenance. The robust clinical function in **e-Health Method™** is based on VistA. Using a desktop or laptop computer with the **e-Health Method™** client software installed, providers and authorized practice staff will be able to log into the central **e-Health Method™** servers at anytime, from any location, with an Internet connection.

Tested and Proven:

VistA is trusted and proven technology. VistA has been honed for over twenty years and used to support the clinical, financial, and administrative needs of the VA's network of 1,400 healthcare facilities, including 160 medical centers.

- VistA has been named one of the best healthcare systems in the nation by the Institute of Medicine.
- For six consecutive years (2001-2006), VA placed first among healthcare providers in the University of Michigan's American Customer Satisfaction Index.
- Harvard University's 2006 American Government Award winner was the VA for its electronic patient records system – VistA.

Reliable:

GMD provides **e-Health Method™**, a comprehensive, full-featured Electronic Medical Records (EMR) system that is based on the US Department of Veterans Affairs' core VistA system. **e-Health Method™** is an Internet-based, subscriber EMR system that facilitates entering and retrieving patient notes, progress charts, lab results, and medication problem history. The modular design of **e-Health Method™** enables GMD to tailor and scale the system to serve the needs of solo practices, clinics, or hospitals. VistA's reliability has been developed and demonstrated in more than twenty years of field experience. Access is available from anywhere, at anytime, 24 hours a day — with or without **Video Consulting**.

Our goal is to ensure continuous service and support your ability to provide continuity of care for your patients in normal

(Continued on page 4)

times or after a disaster strikes. That is why we operate multiple datacenters and store copies of your data more than two thousand miles apart.

Training and Support:

e-Health Method™ subscribers are very important to GMD. We provide you with access to our qualified support representatives to answer your questions 24 hours a day, seven days a week. You can reach us online at www.globalmedicaldata.com/medlogin.htm or at our toll-free Customer Service Center.

We offer a comprehensive training program with two distinct program tracks for clinical application coordinators and system administrators. We use a phased training approach that combines classroom, e-learning, **video conferencing**, and monitored practical experience. Using these methods, you and your staff develop skills and competency with **e-Health Method™**. GMD and partners provide a complete library of system documentation and user guides.
